**Getting Started** 

# Amadeus Vista Getting Started

**Educational Systems and Services** 

## What's New in this Manual

- All the screens have been updated to reflect the new Vista 2.2 interface.
- The Hotels section has been entirely redesigned (pages 16 and 17).
- It is now possible to make a dual air availability request in one step (page 13).
- The Cruise chapter has been removed.

## PREFACE

The purpose of this guide is to introduce you to basic Amadeus Vista functionality, such as:

- Navigating through Amadeus Vista
- Amadeus Vista Online Help
- Amadeus Vista features
- Amadeus Vista Smart Keys

## Audience

This module is intended for agents using Amadeus Vista.

It is a prerequisite that the user already has experience of the travel industry and reservation systems.

#### Where Do I Go for Help?

Amadeus Vista Online Help provides you with both field-level and task-based help. Different options on the Help menu are available to you depending on where you are in Amadeus Vista.

#### What's This?

What's This? provides you with a description of a field's purpose and defines related terms. To display field-level help:

- 1. Place your cursor in any field and press **F1** on your keyboard. This will display a dialog box containing information about the field or option.
- 2. To review the information, scroll down.
- 3. To close the dialog box, click on 🗵 in the top-right corner.

#### How To...

How To... provides you with instructions on how to perform a task, as well as related tasks, and background information. To display task-based help:

- 1. Click on the question mark and select How To....
- Scroll through the list of topics and click on the one you are interested in to expand it. The information, usually a list of numbered steps, will be displayed.
- 3. Similarly, you can collapse a topic by clicking on it again. Then, you can choose another topic.
- 4. To close the dialog box, click on 🗵 in the top-right corner.

## **CHAPTER 1: INTRODUCTION TO AMADEUS VISTA**

With Amadeus Vista, the Amadeus browser-based reservations system, you can book reservations through a graphical interface called the Graphic page or by entering formats in the Command page.

Here are some of the features Amadeus Vista offers:

Graphic page	Translates Amadeus System functionality into a fill-in-the- blanks interface with graphical responses that are easily understood. You can book and price flights, reserve hotel rooms and cars, and view information on a full range of travel services. Pop-up instructions and explanations guide the novice user.
Command page	If you are familiar with Amadeus System formats, you can enter them in the Command page.
Amadeus Vista Online Help	Displays field-level and task-based help.
Amadeus Vista Smart Keys	Customizable toolbar buttons that send formats automatically.

Amadeus Vista also provides advanced features such as interactive seat maps, Travel Choice, and Amadeus Insurance.

Additional Amadeus products, such as Cruise, Ferry,+QC, +Ace, and Ticket Writer, can also be integrated into the Amadeus Vista working environment according to the needs of the agency,

## **CHAPTER 2: SIGNING IN**

You can log into Amadeus Vista by following these steps:

1. Launch Amadeus Vista. The sign-in window appears.

амарі	eus Vista
Your office	ID is NCE1A0950.
Agent sign:	0001 AA SU 🔽
Password:	******
New password:	
Work areas:	🗖 A 🗆 B 🗖 C 🗖 D 🗖 E 🗆 F
	Practice training 🕀
Remote office	
Office ID:	
Terminal ID:	
	Sign In

- 2. Enter your agent sign and initials. For example: 0001AA
- 3. Select your duty code from the drop-down list.
- 4. Enter your password.
- Enter a new password in the New Password field to change your current password. If you do not want to change your password, leave this field blank.
- 6. Under Work areas, select the check box for the areas you want to sign in to.
- 7. Select the Practice Training check box, if you want to sign in to Practice Training.
- 8. Click on Sign In.
- Note: The next time that you sign in, your sign is automatically pre-filled.

## Sign-In Message

When you sign in, informative messages are displayed. For more information about one of the messages, click on **1**. Otherwise, click on OK.

## Signing Out

To sign out of Amadeus Vista:

1. Click on the tab at the bottom of the screen for the area you are working in.

Sign-out				
Suspend				
Enter training				
Properties				
A 🔺	B 🔺 (	C 🔺	D 🔺	E 🔺

2. Click on Sign-out.

You can't sign out if you have an active PNR in your work area.

To close Amadeus Vista:

1. Click on the Amadeus Vista menu.

- 2. Click on Exit.
- 3. To close the Amadeus Vista window, click on 🖄 in the upper-right corner of the screen.

## **CHAPTER 3: WORKING WITH THE GRAPHIC PAGE**

The Graphic page is the main area in Amadeus Vista. From here, you can access most of the Amadeus system functions by clicking on one of the tabs at the top of the screen. Each tab represents an area of the Amadeus system. If you are not sure what a tab's picture represents, hold your mouse pointer over it for a few seconds and you will see a tool tip, or description.

The Graphic page also gives you access to work areas A-F; you click on the tabs at the bottom of the screen. Having different work areas allows you to work on different tasks at the same time. You will need to sign in to each new work area.

## **Graphic Page Tabs**

The **PNR** tab is the first tab you normally see when you open Amadeus Vista. You can use it to create, retrieve, modify, and claim PNRs.

From the **Document Print** tab, you can display, fax, or print invoices and itineraries, as well as print tickets.

From the **Profile** tab, you can use the Open screen to retrieve traveler or company profiles. You can also add, update, and delete profile elements or transfer profile elements to a PNR.

Click on the AIS tab to access the Amadeus Information System.

In the Air tab you can view availability and flight information and make reservations.

Choose the Car tab to make a rental car booking or obtain information about rental cars.

Click on the **Hotel** tab to book a hotel or obtain information about hotels and other kinds of accommodation.

In the **Amadeus Insurance** tab you can review and book various types of travel insurance policies.

In the Fare tab, you can find a fare, price a PNR, and store a fare.

Choose the **Queue** tab to display queue counts and perform a variety of queue functions including queue messages and printing.

## **Frequently Used Icons**

The following table provides you with a list of the most frequently used icons:

$ \sim $	Clears all fields and resets values to the default
$\approx$	Closes the input window
$\triangleleft \triangleright$	Moves to the previous/next page [MU/MD]
R .	Reopens the input window
1	Modifies the selected line
X	Deletes the selected line

## Making a Reservation

In the following scenario, a traveler, Mr Johnson, wants to fly from London to Los Angeles on business. He would like to stay for one week in a hotel and rent a car.

Here are the steps that you can take to make a simple reservation for him in the Graphic page.

- Creating a PNR from a profile
- Making an air booking
- Making a meal request
- Reserving a hotel
- Making a car booking
- Pricing the itinerary
- Printing the itinerary and tickets
- Saving the PNR

## Step 1: Creating a PNR from a Profile

You can create a PNR from an existing profile by following these steps:

- 1. Click on the PNR tab.
- 2. Click on the From Profile sub-tab.
- 3. Enter Mr Johnson's profile information.
- 4. Click on Send.

amadeus <b>vista -</b> 🛛 🐓															
1		🖹 💆	🤗   🕸	🏼 🖉 🚽	i

## Step 2: Making an Air Booking

Next, you can book the flights for Mr. Johnson for his trip to Los Angeles.

- 1. Click on the Air tab.
- 2. Enter the flight information, such as the From field, To field, and departure date.

amadeus <b>vista -</b>	¥	?

3. Select the Save option that you want to use.

4. Click on Send.

## Customizing the Graphic Page

You can customize the tabs in Amadeus Vista by using the Options dialog box. To do this:

1. Click on the Amadeus Vista menu from the screen header.

amadeus <b>vista</b>	Refresh						
	Options	jā,	2	<b>P</b>	<b>8</b>	2	
	Exit				1	lew From	n profile
🗊 Open PNR							

2. Select Options.

The Options dialog box is displayed:

Amadeu	ıs Vista: I	Options Wel	b Page Dialog		
Tab sett	ings				▼ ?
Loaded	Rank			Default	Shortkey
1	1	r	PNR	$\odot$	Р
-	2	2	Command Page	0	D

					Reset
			OK Cance		Apply

From this window, you can:

- Choose which Graphic page tab will appear first when you open Amadeus Vista. (You select it in the Default column.)
- Reorder your tabs by selecting a tab and then using the ▲ and ▼ buttons to move it.
- Select the Preload check box option to quickly load the tabs you use most.
- Restore the default settings by using the Reset button.

## CHAPTER 4: WORKING WITH THE COMMAND PAGE

If you are familiar with cryptic formats, you can use the Command page to process transactions in the Amadeus system. To access the Command page,

click on the Command Page tab

amadeus	vista <del>-</del>	\$1									?
<b>P</b>	<b>I</b>	<u>S</u>	<u>à</u>		2	9	8	2	<i>a</i>	1	
Command p	age						0 0	0 🔬 💭	🔏 📕 🖥	🧟 🗐 🖡	) 🖉 🗇

There are thirteen tools available in the Command page:

0	$\odot$		C.	${\mathbb D}$	1	5			a	Ð	Ø	đ
1	2	3	4	5	6	7	8	9	10	11	12	13

- 1) Pause Smart Key Pauses the current Smart Key.
- 2) Resume Smart Key Resumes the current Smart Key.
- 3) Stop Smart Key Stops the current Smart Key.
- 4) Open Smart Key Editor Opens the Smart Key Editor, which allows you to create, modify, copy, and delete Smart Keys.
- 5) Previously sent Amadeus commands Displays a list of previously sent commands that you can modify and resend.
- 6) Clear page Clears the current screen.
- 7) Clear all pages Clears the current screen and buffer.
- 8) Split window Splits the window into two work areas. A horizontal drag bar appears, and you can change the size of each area.
- 9) Customize Customizes your Command page colors and fonts.
- 10) Select All Selects the current screen and buffer.
- 11) Copy Copies the selected area.
- 12) Paste Pastes the selected text into a file or an e-mail.
- 13) Print screen Prints the current screen.

## Speed Mode

Speed Mode is a useful tool that will help you decrease the time you spend making reservations by allowing you to use your mouse more often while in the Command page.

To activate Speed Mode, click on the Customize icon, and select the Configuration tab. Select the Speed Mode check box, then click on OK.

When Speed Mode is activated, a toolbar appears with buttons for commonly used formats. In certain displays, Air Availability for example, the display items are shown in different colors. You can use the buttons on the toolbar to run formats based on the information in these items.

For example, in the display below you can click on the FQD (Fare Quote Display) button, and then double-click on line 1.

Notice that the Speed Mode buttons have changed according to the new display. Try this a few times to familiarize yourself with how it works. If you need help at any time, press the spacebar and F1 keys simultaneously to display help.

## Customizing the Command Page

Amadeus Vista gives you the ability to change the color scheme and fonts on your Command page.

To customize your Amadeus Vista Command page:

1. On the Amadeus Vista Command page toolbar, click on 🉀 . The Customization Web Page dialog box appears.

🚰 Customization Web Page I	Dialog			×
🧟 Preferences				
Customization Configuratio	n			
🧭 Background / Foreground	d colors			
Blue/Navy			•	
A Font assignment	01-1-	<u> </u>		
Name Courier New	Style Regular	Size	sample text	
			Sampie text	
@MS Mincho AMADEUS	Regular Italic			
Arial monospaced for	Bold	10		
BC C39 3 to 1 Mediur	Bold Italic	11 💌		
				-
			Ok Cancel	

- 2. Select your Background/Foreground colors from the drop-down menu.
- 3. Under Font Assignment, select the name, style, and size of your fonts. You will see a preview in the sample text on the right.
- 4. From the Configuration tab, select which graphical displays you want to use, for example Seat map or TST. You can also activate or disactivate Speed Mode.
- 5. Click on OK when you have finished. Amadeus Vista closes the Customization dialog and displays the desktop with the new settings.

## Amadeus Vista Smart Keys

Smart Keys are customizable toolbar buttons that send formats automatically to the Amadeus system. Amadeus Vista comes with 21 pre-defined Smart Keys, called Public Smart Keys, for frequently used formats. Additionally, agents in your office with a supervisor (SU) duty code can create Office Smart Keys for all agents in the office to use. You can also create My Smart Keys for personal use.

	Scripts	Public Smart Keys	Office Smart Keys	My Smart Keys
ET ER RT IG IR TQT XI	MD MU QT	QD QII QI	QU RL AP	ARNK FXX •
HE/ RH TTP		789778	DT ALA	

#### **Public Smart Keys**

Here is a description of the Smart Keys that come with Amadeus Vista:

ET	End the transaction
ER	End transaction and redisplay the PNR
RT	Redisplay the current PNR
IG	Ignore the PNR
IR	Ignore the PNR and redisplay it
тот	Display the TST for the PNR
XI	Cancel the itinerary
MD	Move down
MU	Move up
QT	Display a queue count
QD	Delay to the bottom of the queue
QN	Remove from the queue and display next
QI	Ignore and exit queue
QU	Redisplay message from queue
RL	Display airline system record locator
ΑΡ	Add a phone contact
ARNK	Add an ARNK (Arrival Unknown) segment
FXX	Price a PNR without creating a TST
HE/	Display format-sensitive help
RH	Display PNR History
ТТР	Print a ticket

#### **Creating Smart Keys**

Smart Keys can make your job easier by automating certain tasks such as displaying availability and fares. The following is an example of a Smart Key that displays availability and fares in a split screen.

🎒 Smart Key editor	window -	Micr	osoft Int	ernet Explo	rer provided by Ama	deus s.a.s.

- 1. In the Command page click on 🔣 to open the Smart Key Editor.
- 2. Enter a name for your Smart Key (no spaces) in the Smart Key name field. For this example, let's use AVL\_FQD.
- 3. Enter a name for your Smart Key's button in the Label field. It should be four letters long, no spaces. Let's use AVFQ.
- 4. Select My Smart Keys, or if you are a supervisor and want your whole office to be able to use this Smart Key, select Office.
- 5. Enter a short description of your Smart Key in the Description field.
- 6. In the Definition text box, enter the formats and functions that your Smart Key will perform. You can program your Smart Key with variables to prompt you for data that will change each time, such as a date. Look at the sample definition below:

**AD**<?Enter date (EX: 10JUN)@Date>**IAH**<?Enter destination city or airport (EX: SFO)@Destination>/**A**[<?Enter Airline code(EX: CO)@airline>] <SEND> <SWITCH WINDOW>**FQDIAH**<@Destination>/**D**<@Date><SEND><\*Must be in split window\*>

7. As you can see it is a combination of formats (bold), variables (italics), and commands (capitalized).

8. Now, click on Save. A confirmation appears.

🚰 Information Web Page Dialog		x
The following Smart Key has been successfully created :AVL_FQD.		
	OK	

9. Click on OK.

#### **Testing a Smart Key**

- 1. Let's test your Smart Key. Close the Smart Key Editor by clicking on in the top-right corner to return to the Amadeus Vista Command page.
- 2. If you are not in split screen mode, click on 🚍 .
- 3. Next, click on the My Smart Keys tab.
- 4. Click on your new Smart Key. The first message will prompt you for a date:

🚰 Availability and Fare (split screen) Web Page Dialog	×
Enter date (EX: 10JUN)	[
12DEC	
	Send

- 5. Enter a date, and click on Send. Next, you will be prompted for the destination city.
- 6. Enter a city and click on Send again. The last prompt asks you for an airline code.Enter the airline code and click on Send one last time. Here is the response:

There are many uses for Smart Keys. A great way to learn to program Smart Keys is to click on ?? in the Smart Key Editor. There, you can learn the syntax and commands that make up the Smart Key language. Then you can use it to customize your own Smart Keys and enhance your productivity. You can also learn how to modify and delete existing Smart Keys.

## APPENDIX A: KEYBOARD NAVIGATION

Within Amadeus Vista you can use your keyboard to navigate quickly and accomplish a whole range of tasks. Below you will see a list of keyboard shortcuts along with an explanation of what each one does.

Press:	То:
F1	Display Help for a selected field. If no field has been selected, Help for the first mandatory field will be displayed.
ТАВ	Select the next screen item, for example, field, icon, button.
SHIFT+TAB	Select the preceding screen item, for example, field, icon, button.
Contextual menu key	Display items from the toolbar as a contextual menu.
SHIFT+F10	Display items from the toolbar as a contextual menu.
HOME	Scroll to the top of the screen.
END	Scroll to the bottom of the screen.
ESCAPE	Close any pop-up window as well as the Help window.
PAGE UP	Open the More Options screen section.
PAGE DOWN	Close the More Options screen section.
ENTER	Activate the selected button or function.
SPACE	Activate the selected icon. This also selects and clears a check box.
CTRL+W	Close Amadeus Vista.
CTRL+J	Toggle between the Command page and the Graphic page.
CTRL+TAB	Move the focus to the toolbar.
ALT+LETTER	Move to a specific work area.

## Navigating from One Area Tab to Another

Press:	То:
ALT + 0	Open the Globe menu.
ALT + NUMBER	Open a specific work area tab from the front row. The number entered relates to where it appears in the row. For example, if the Air tab is placed fourth from the left, press ALT 4 to open it.
ALT + SHIFT + NUMBER	Open a specific work area tab from the back row. The number entered relates to where it appears in the row. For example, if the Document Print tab is placed second from the left, press ALT + SHIFT + 2 to open it.

#### Navigating in the Quick PNR Area

Press	То
CTRL + INSERT	Add a new row.
CTRL + DELETE	Remove a new row.
CTRL + UP ARROW	Move to the previous section of the screen. <b>Note:</b> This shortcut also works in the Profiles treeview and within the Travel Assistance area.
CTRL+DOWN ARROW	Move to the next section of the screen. <b>Note:</b> This shortcut also works in the Profiles treeview and within the Travel Assistance area.

#### Using the Text Shortcut Keys

Press:	То:
DOWN ARROW	Open the Encode window associated to a particular field.
CTRL + RIGHT ARROW	Move the cursor one word to the right.
CTRL + LEFT ARROW	Move the cursor one word to the left.
SHIFT + HOME	Extend a selection to the beginning of a line.
SHIFT + END	Extend a selection to the end of a line.
SHIFT + RIGHT ARROW	Extend the selection one character to the right.
SHIFT + LEFT ARROW	Extend the selection one character to the left.
SHIFT + CTRL + RIGHT	Extend the selection one word to the right.

Press:	То:
SHIFT + CTRL + LEFT	Extend the selection one word to the left.
CTRL + C	Copy text to the clipboard.
CTRL + X	Cut the selected text to the clipboard.
CTRL + V	Paste the clipboard contents.

## Using the Drop-down List Shortcut Entries

Press:	То:
DOWN ARROW or RIGHT ARROW	Move the cursor to the next item in the list.
UP ARROW or LEFT ARROW	Move the cursor back one item in the list.
PAGE UP	Move the focus to the item located on top of the previous page, according to the size of the list displayed.
PAGE DOWN	Move the focus to the item located on top of the next page, according to the size of the list displayed.
HOME	Move the cursor to the first item in the list.
END	Move the cursor to the last item in the list.
SPACEBAR	Select the item and close the list.
ENTER	Activate the selected function and close the menu.
ESCAPE	Close the menu.

## Using the Contextual Menu Shortcut Keys

Press:	То:
UP ARROW	Select the previous menu.
DOWN ARROW	Select the next menu item.
ESCAPE	Close the menu.
ENTER	Activate the selected function and close the menu.
